

Campaign Funnel

Campaign Funnel Concept

Definition:

A campaign funnel is a structured sequence of steps designed to guide users from first awareness of an offer or event to a final action, such as registration, purchase, or subscription.

Purpose:

- Attract and engage potential users.
- Capture leads and collect relevant information.
- Convert interested users into registered participants or customers.
- Lay the foundation for future interactions and retention.

Campaign Funnel Logic

1. Attract (Awareness): Users discover the event.
2. Capture (Interest): Users are encouraged to take action (click CTA, go to registration).
3. Convert (Action): Users complete the registration form.
4. Confirm / Retain (Thank You): Users receive confirmation and guidance for next steps.

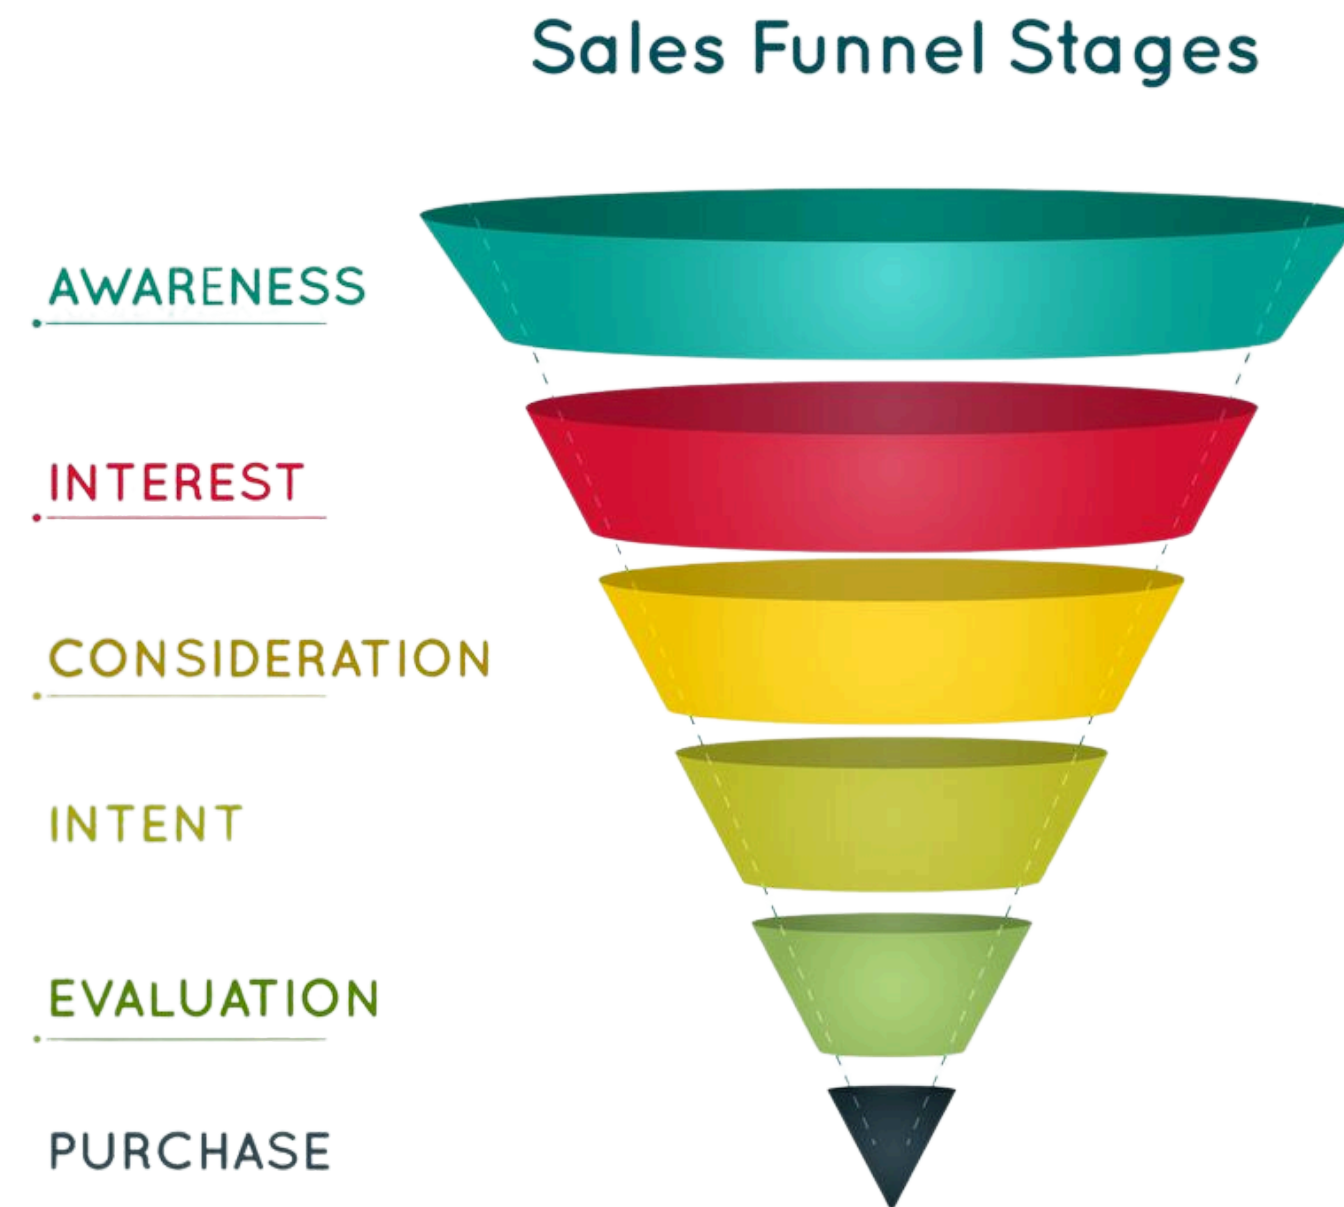

Funnel Structure and Sections

Top of Funnel : Awareness Section

Middle of Funnel: Interest / Engagement & Consideration Section

Bottom of Funnel: Action / Conversion Section

Top of Funnel (TOFU) Components

Key Principle One clear message. One main action.

Purpose

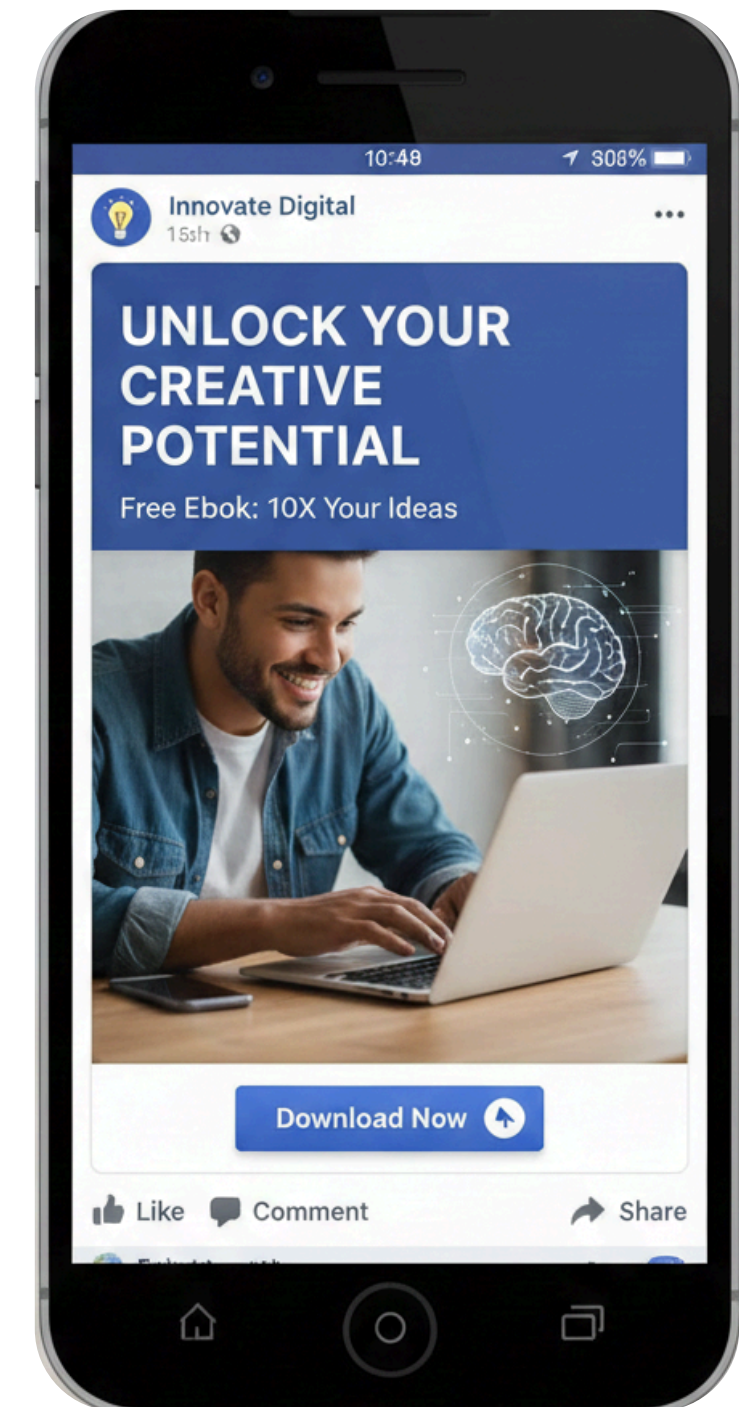

- Introduce the offer or idea.
- Capture attention.
- Make the visitor understand what this is in a few seconds.

Core Components

- Headline (clear, simple value statement)
- Sub-headline (explains or supports the headline)
- Visual element (image, illustration, icon, hero section)
- Short explanation or summary
- Primary Call-to-Action (CTA)

Common CTAs

- Learn More
- Get Started
- Discover

Upper-Middle of Funnel (UOFU) Components

Purpose

- Build interest.
- Explain benefits.
- Keep the user engaged.

Core Components

- Benefits list (what the user gains)
- Features overview (what it includes)
- Social proof (testimonials, logos, numbers)
- Supporting visuals or icons
- Secondary CTA(Call-to-action)

Common CTAs

- See Details
- View Features
- Continue
- Learn How It Works

Lower-Middle of Funnel (LOFU) Components

Key Principle Answer objections before the user asks.

Purpose

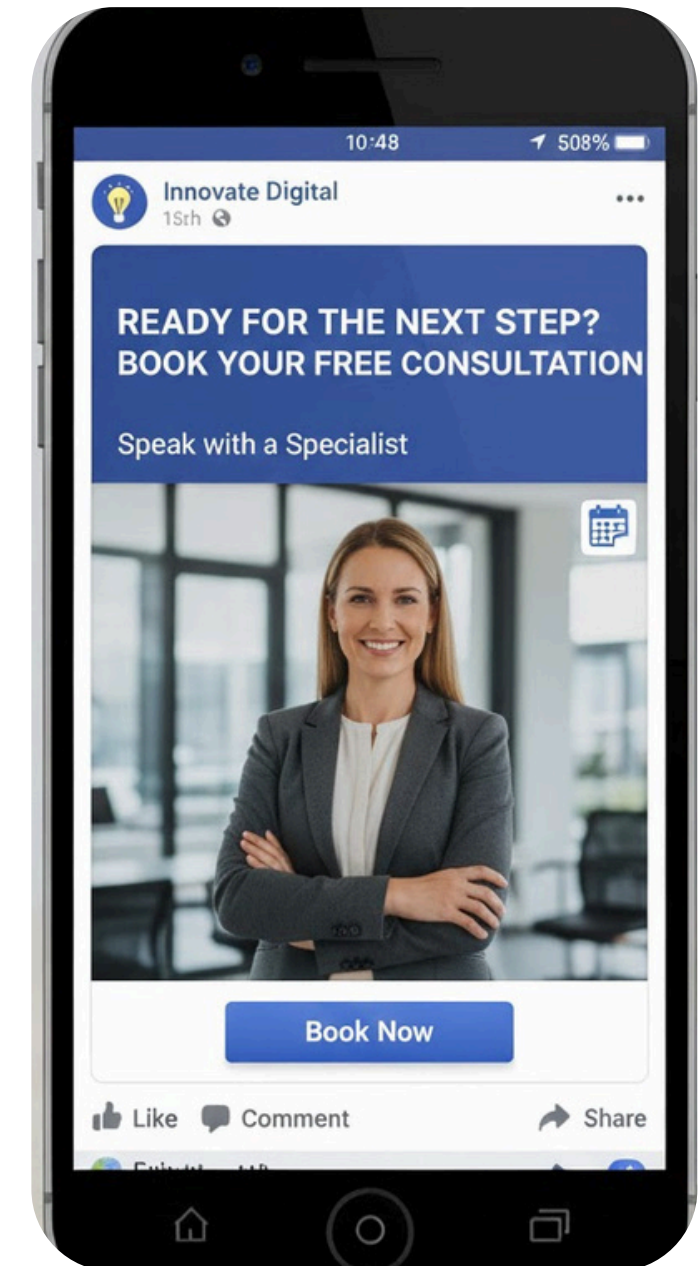

- Help the user decide.
- Remove doubts.
- Provide clarity.

Core Components

- Detailed explanation
- FAQs(frequently asked questions)
- Comparison tables
- Use cases or examples
- Trust signals (reviews, guarantees, credentials)
- Clear next-step CTA(Call-to-action)

Common CTAs

- Sign Up
- Register
- Request Access
- Start Free

Bottom of Funnel (BOFU) Components

Key Principle Remove friction. Fewer fields = higher conversion.

Purpose

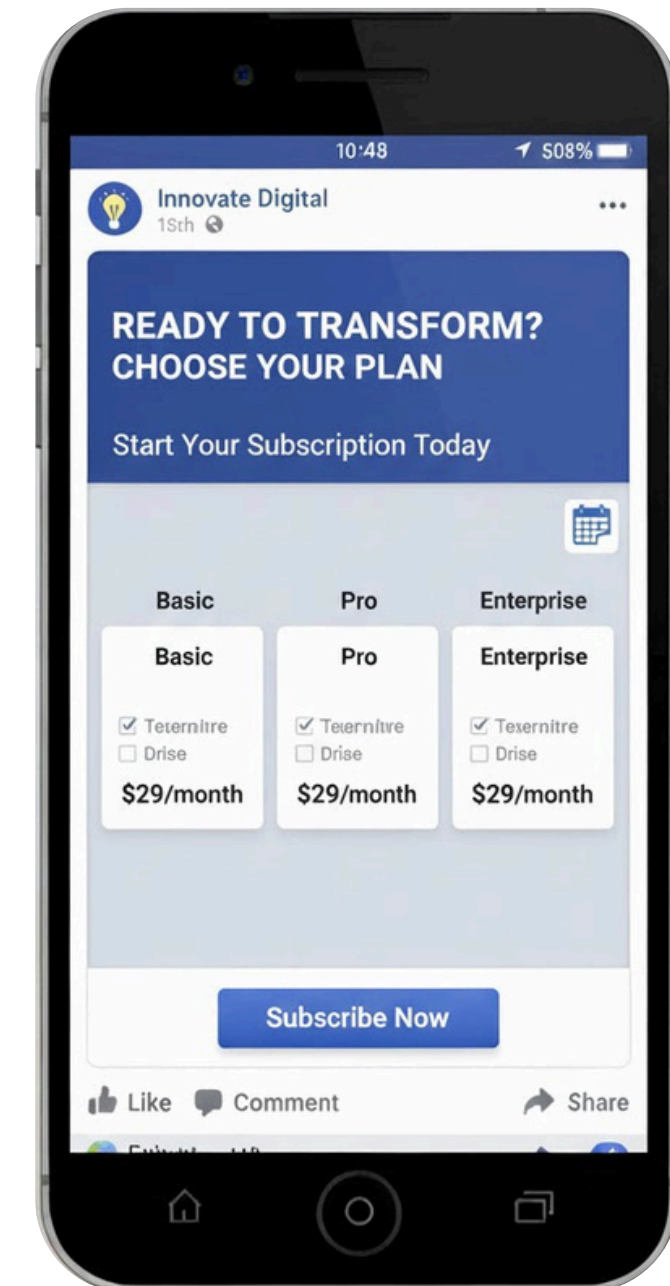

- Get the user to take action.
- Convert interest into commitment.

Core Components

- Form or checkout
- Minimal required inputs
- Clear instructions
- Strong CTA button
- Error handling and feedback
- Security or trust notes (if applicable)

Common CTAs

- Submit
- Complete
- Confirm
- Buy Now

Confirmation / Thank-You Section

Key Principle Never leave the user unsure if it worked.

Purpose

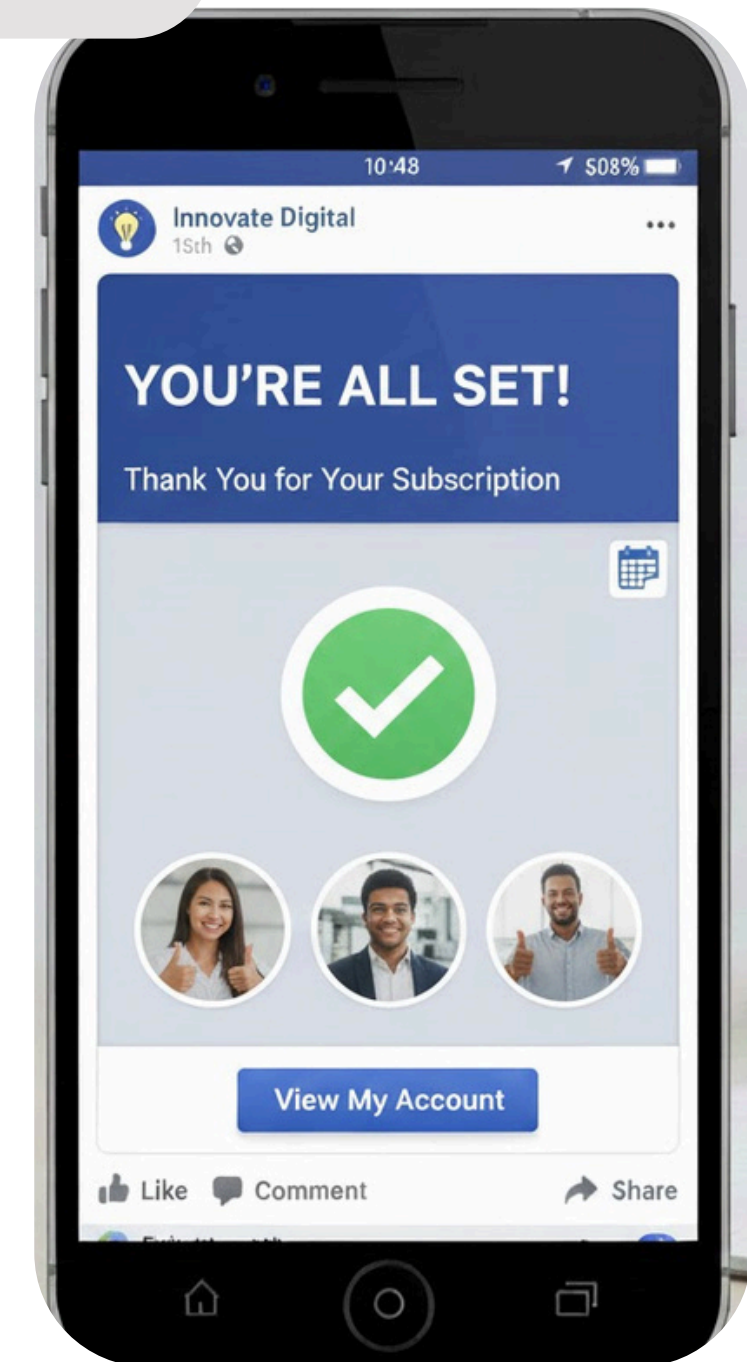

- Confirm action success.
- Reduce anxiety.
- Set expectations.

Core Components

- Confirmation message
- Summary of action taken
- Next steps explanation
- Optional navigation or sharing options

Common CTAs

- Go Back
- Share
- View Details
- Continue

Retention / Follow-Up Section (Post-Funnel)

Key Principle The funnel does not end at conversion.

Purpose

- Maintain relationship.
- Encourage repeat actions.

Core Components

- Follow-up messages or emails
- Additional resources
- Upsells or related offers
- Community or social links

Logical Flow of a Funnel

Each section should answer one question only:

What is this?

Why should I care?

Is it right for me?

What should I do?

Did it work?

Project Overview

Event Registration Funnel (Multi-Page Website)

Steps to Implement the Event Registration Funnel

Step 1: Define Funnel Goals

- Clarify the purpose of the funnel
- Validate the user journey: landing → registration → confirmation.
- Sketch your full wireframe

Project: Event Registration Funnel (Multi-Page Website)

Step 2: Plan the Pages

Sketch the structure of each page:

Landing page with CTA

Registration page with form

Thank-you page with confirmation message

Decide the flow between pages and actions that trigger navigation.

Project: Event Registration Funnel (Multi-Page Website)

Step 3: Describe layout and flow

Write a full description about each section

Focus on essential content: event title, benefits, details, and registration form.

Project: Event Registration Funnel (Multi-Page Website)

Step 4: Implement Interactivity

Plan user interactions:

Button clicks that navigate between pages.

Form input validation for required fields.

Feedback messages when users submit or make errors.

Keep interactions simple, as integrations will come later.

Project: Event Registration Funnel (Multi-Page Website)

Step 5: Test the Funnel

Ensure all pages link correctly.

Test the functionality.

Check the layout and Responsive design

Check that all your images appear correctly on the deployment link
